

Ideation Phase Empathize & Discover

Date	03.10.2026
Team ID:	6ab8b2d930f9767f8772e455 / SWTID-2026-8679
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Project context:

Auto Ticket Classification using Flow Designer is a ServiceNow Personal Developer Instance (PDI) project built with Flow Designer. When a school IT support ticket is created with an empty Category, the Flow *Auto Classify School IT Tickets* reads the Short Description, sets the Category and Subcategory, and sends a confirmation email to the Caller. The user in this empathy map is the **Caller**: a school staff member who reports an IT issue.
