

Project Design Phase-II Data Flow Diagram & User Stories

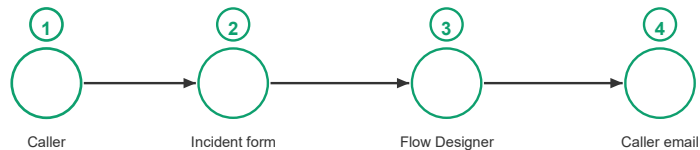

Date	03.10.2026
Team ID:	6ab8b2d930f9767f8772e455 / SWTID-2026-8679
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

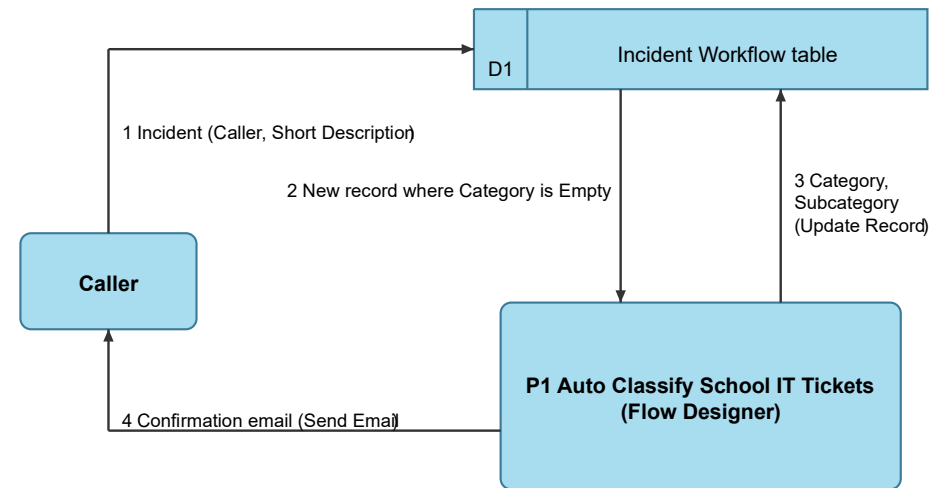

Example: (Simplified)

Flow (Simplified)

1. Caller creates an incident with a Short Description in ServiceNow.
2. The Record Created trigger starts the flow when Category is Empty.
3. Flow Designer checks the Short Description using If / Else If conditions.
4. Update Record sets the Category and Subcategory on the incident.
5. Send Email sends a confirmation to the Caller's email.

Example: DFD Level 0 - Auto Ticket Classification

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Caller (School staff user)	Ticket Submission	USN-1	As a Caller, I can create an incident with a Short Description of my IT issue.	A new record is created in the Incident Workflow table with my Short Description.	High	Milestone 3
	Flow Trigger	USN-2	As a Caller, I want my new ticket to be picked up automatically when its Category is empty.	The flow starts on Record Created when Category is Empty.	High	Milestone 3
	Ticket Classification	USN-3	As a Caller, my ticket with Wi-Fi or Network in the Short Description is classified as Network / Wi-Fi.	Category = Network and Subcategory = Wi-Fi after the flow runs.	High	Milestone 3
		USN-4	As a Caller, my ticket with Projector in the Short Description is classified as Hardware / Projector.	Category = Hardware and Subcategory = Projector after the flow runs.	High	Milestone 3

		USN-5	As a Caller, my ticket with Forgot password in the Short Description is classified as Access / Forgot Password.	Category = Access and Subcategory = Forgot Password after the flow runs.	High	Milestone 3
		USN-6	As a Caller, my ticket with Slow Computer in the Short Description is classified as Performance / Slow Computer.	Category = Performance and Subcategory = Slow Computer after the flow runs.	High	Milestone 3
	Email Notification	USN-7	As a Caller, I receive a confirmation email after my ticket is processed.	An email with the subject Your Request for the issue has been submitted. is sent to the Caller's email.	High	Milestone 3
IT Support Team Member	Ticket Handling	USN-8	As an IT support team member, I can see the Category and Subcategory already set on new tickets.	Category and Subcategory are populated for tickets that match a condition.	Medium	Milestone 3
Administrator (Flow developer)	Flow Setup	USN-9	As an administrator, I can build the flow Auto Classify School IT Tickets in Flow Designer (Global application).	The flow exists with the trigger, conditions, Update Record and Send Email actions.	High	Milestone 3
	Activation & Testing	USN-10	As an administrator, I can activate the flow and test it with sample tickets.	Tested with sample tickets and classification results were verified	High	Milestone 3

Priority and release values are proposed for Milestone 3; the flow is still being built, so no story is marked complete.
