

Project Development Phase Model Performance Test

Date	03/09/2026
Team ID:	6ab8b2d930f9767f8772e455 / SWTID-2026-8679
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	10 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Metrics	Regression Model: MAE – Not applicable; MSE – Not applicable; RMSE – Not applicable; R2 score – Not applicable. Classification Model: Confusion Matrix – Not applicable; Accuracy Score – Not applicable; Classification Report – Not applicable. The project uses rule-based keyword classification in ServiceNow Flow Designer (no-code, no machine-learning model), so these metrics are not computed. Functional result: both test scenarios were classified as expected: • INC00511 “WiFi not working in library” → Network / Wi-Fi • INC00512 “Projector not turning on” → Hardware / Projector	
2.	Tune the Model	Hyperparameter Tuning – Not applicable (no trained model). The keyword conditions (Wi-Fi/Network, Projector, Forgot password, Slow computer) were configured manually in the flow. Validation Method – Manual functional testing: enter Caller and Short description, save and reload the form, verify Category/Subcategory, and verify the confirmation email in System Logs → Emails (Preview Email).
