

Project Development Phase Model Performance Test

Date	03/10/2026
Team ID	6ab8b2d930f9767f8772e455
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No	Parameter	Screenshot / Values
1.	Data Rendered	Ticket data is stored in the custom table Incident WorkFlow (u_incident_workflow) with fields: Number (auto-number, prefix INC), Caller, Category, Subcategory, Short Description, Description, State, Assigned Group, Assigned to. Records are displayed on the Incident Workflow form (e.g., INC00511). 
2.	Data Preprocessing	No separate preprocessing step; data is standardized at capture: choice lists for Category, Subcategory and State, a dependent Subcategory (Wi-Fi → Network, Projector → Hardware, Forgot Password → Access, Slow Computer → Performance), reference fields (sys_user, sys_user_group) and auto-numbering. 
3.	Utilization of Data Filters	Flow trigger condition: Category is empty (Record Created on Incident Workflow). Classification conditions: Short description contains Wi-Fi / Network, Projector, Forgot password, Slow computer. Emails list filtered by Subject. 
4.	DAX Queries Used	Not applicable – no Power BI / DAX is used; classification is configured in Flow Designer.

5.	Dashboard design	No of Visualizations / Graphs – 0 (no dashboard in this project).
6.	Report Design	No of Visualizations / Graphs – 0 (no report in this project).
